Giro Account No.: 2817.

Professor Joshua Lederberg
Dept. of Genetics
University of Wisconsin
Madison 6

August 3 1956

Dear Professor Lederberg,

Thank you for your letter of July 25.

I am enclosing a list of our biochemical tests, only including those which are different for the strains involved. We have listed the results which we have got with your strains and ~~which we have got~~ with the test strains of the O-groups concerned. The biochemical reactions are very stable and have not changed when they are repeated with many years interval.

Don't you think it could be practical if we made arrangements for serum production in this laboratory during our stay in Madison. It will be quite easy to send eventual strains to Copenhagen, to have the rabbit immunization carried out here and to have the resulting serum returned to Madison.

With kind regards

Ida and Frits Ørskov

PS. Do you know anything about the present situation of Dr. Heymann, is he going to Madison this autumn, we have not heard from him for some time.
